## QUALITY OF CARE

---

**Compassionate Staff:** At Raleigh Radiology, we pride ourselves on providing the highest quality and compassionate care. Our experienced and caring staff will explain every step of your procedure while offering you privacy, comfort and a special hand if needed. Your experience at Raleigh Radiology is important to us which is why we utilize a patient satisfaction survey tool. We value your feedback which helps us continue to provide excellent service.

**Board Certified:** The physicians at Raleigh Radiology are board-certified radiologists. Remember you have a choice in where your imaging is performed. Ask your doctor to schedule all of your imaging with a board-certified, sub-specialized radiology imaging group.

**Sub-specialized fellowship trained:** Our Radiologists have completed additional fellowship training (1-3 years), making them subspecialty trained in neuroradiology, musculoskeletal radiology, women's imaging, abdominal imaging, vascular/interventional radiology among other subspecialties.

**Registered Technologists (ARRT) & (ARDMS):** American Registry of Radiologic Technologists and American Registry of Diagnostic Medical Sonography. The technologists at Raleigh Radiology have globally recognized registries in chosen modalities. Because some imaging techniques involve the use of radiation, adequate training in and understanding of radiation safety and protection is important.

**ACR Accredited:** Our modalities are accredited by the American College of Radiology.

**Advanced Technology:** All of the Raleigh Radiology facilities offer fully digital State-of-the-Art equipment. We are the area's only fully open bore MRI practice.

**Convenient Parking:** All of Raleigh Radiology locations have ample and well lit parking and are handicap accessible.

**Extended hours:** Please visit our website for extended and weekend hours for our facilities.

**Care Credit:** Care Credit is a medical credit card which allows you to pay for healthcare services with interest free monthly payments. Visit our website at [www.raleighrad.com](http://www.raleighrad.com) for all payment options

**Radiation Safety:** We participate in rigorous programs and ensure our patients receive only the necessary amounts of radiation needed to achieve a quality image to properly diagnose a patient. We have pledged to **Image Wisely** and **Image Gently**, ACR radiation safety programs designed to reduce radiation exposure in both adults and children.
